

Splash Science Lab

Newly Revised "Splash" Science Mobile Lab

The newly Revised Splash is a completely self-contained mobile laboratory that provides your students with hands-on experience. It is truly a field trip that comes to your school addressing local up to date issues about the state of our water:

- New watershed/storm drain model demonstrations!
- State of the art GIS (geographic information systems) computer stations (New!)
- A Water Conservation station (New!)
- A San Diego Estuary station (New!)
- Microscopes
- Chemistry Experiments
- Cooperative learning skills

Students conduct a scientific investigation about how water pollution affects the environment and wildlife. The Splash Science Mobile Lab is designed for students in grades 4th, 5th, and 6th and aligned with the California State Science Content standards and Environmental Education Principles and Concepts.
